

ANNUAL ACCOUNTS & TAX RETURNS (CASH ACCOUNTING, STATEMENT OF REVENUES AND EXPENDITURES)

You may have your cash accounting customised precisely to your needs and carried out by us. Based on individually adjusted service packages, you decide which of the activities remain under your responsibility and which of them will be assumed by us.

You may choose between three service packages:

CASUAL

With our basic service package, CASUAL, you provide your company with top-quality, professional preparation of your cash accounting that is always up-to-date, including tax returns, guaranteeing compliance with all applicable legislation and statutory requirements. You will benefit from savings in personnel costs and investments in data processing. You will obtain autonomy from staff shortages and get top-quality cash accounting. Plus: your service package can be extended by individual extra services at any time and with utmost cost transparency.

TREND

In addition to the CASUAL basic service, the next higher service package, TREND, offers you an annual personal meeting and a business analysis of your company. Additionally, your company will benefit from the gratuitous review of official notifications. Plus: your service package can be extended by individual extra services at any time and with utmost cost transparency.

SUPERIOR

The premium service package, SUPERIOR, provides you with a comprehensive 'no worries' package for your company, apart from the basic and additional services of CASUAL and TREND. In addition to asserting your legal position vis-à-vis the tax office, you will benefit from assistance with tax office enquiries and audits, and from the timely transmission of the relevant returns under § 109a and 109b EStG (Austrian income tax act). Your Superior package may equally be extended by individual extra services with utmost cost transparency.

Maximum individuality, quality and transparency

- Services are agreed upon in writing in advance
 - Agreement of a fixed fee
 - Service flexibility based on your individual definition of the service mix
 - Joint needs assessment for services
- You will get what you actually need!*
