

ACCOUNTING: DOUBLE-ENTRY BOOKKEEPING

You may have your accounting customised precisely to your needs and carried out by us. Based on individually adjusted service packages, you decide which of the activities remain under your responsibility and which of them will be assumed by us.

You may choose between three service packages:

CASUAL

With our basic service package, CASUAL, you provide your company with top-quality, professional accounting that is always up-to-date, guaranteeing compliance with all applicable legislation and statutory requirements. Apart from saving personnel costs and investments in data processing, you may expect to benefit from full autonomy with respect to staff shortages. Thus, you can focus on your core business with all you got. Plus: your service package can be extended by individual extra services at any time and with utmost cost transparency.

TREND

In addition to the CASUAL basic service, the next higher service package, TREND, provides you with a permanently available overall view of your company based on the current short-term profit & loss account (KERF). Additionally, your company will benefit from time savings by outsourcing the communication with authorities and gratuitous accounting enquiries. Here, too, your service package can be extended by individual extra services at any time and with utmost cost transparency.

SUPERIOR

The premium service package, SUPERIOR, provides you with a comprehensive 'no worries' package for your company, apart from the basic and additional services of CASUAL and TREND. In addition to the classic business analysis, you will benefit from strategic business development that we are going to take care of together with you. Among others, missed deadlines are a thing of the past; and we ensure the high-quality processing of applications to tax offices, authorities and banks, as well as the active management of outstanding accounts for you. Your Superior package may equally be extended by individual extra services with utmost cost transparency.

Maximum individuality, quality and transparency

- Services are agreed upon in writing in advance
- Agreement of a fixed fee
- Service flexibility based on your individual definition of the service mix
- Joint needs assessment for services

You will get what you actually need!
